Conditions of Sale

Orders Are Accepted Subject to prior sale, and to condition of stock at delivery date, under the following terms.

Goods in Transit—All goods are at purchaser's risk after they are delivered to the forwarding companies and we receive their receipt for the shipment in good condition.

Claims must be made within **five days** after receipt of goods.

Prices in this catalogue cancel all previous lists and quotations, are subject to change without notice and they are F.O.B. our nurseries, packing extra. **A quantity discount, 10% of the lowest listed price, will be allowed on orders calling for 25 or more of any one variety and size.**

Terms Cash—For customers of established credit accounts will be opened due in 30 days from date of invoice. Interest at six per cent (6%) per year will be charged on all accounts from due date. Orders for C.O.D. shipment must be accompanied by one-third of the amount.

Special Selection—Plant materials specially selected at the nursery will be sold at prices commensurate with the value of the specimens chosen, irrespective of the listed prices.

Ball and Burlap—The specification "B&B" in this list signifies digging with a ball of earth, which, where indicated, is included in the price. For digging all other items (not specified B&B) in this manner, there is an additional charge based upon the dimensions of the earth ball as follows:

9" diam.....	\$.40	21" diam.....	\$3.00	42" diam.....	\$12.00

QUALITY FIRST

Quality in plant material varies to such an extent that price is by no means a criterion. The correct method of propagation, scientific pruning of both root and branch, systematic maintenance, are essential steps in the production of really good trees and plants. During the juvenile stage, such as seen in the nursery row, quality is not always apparent because the unseen root system is of paramount importance.

It has been our policy during the past fifty-five years to produce top grade plants and trees at prices as low as possible, consistent with such quality. This policy we intend to continue and earnestly suggest you personally inspect our stock.

PLANT COMBINATIONS

Most of the pleasing effects created in the garden are made by arranging complimentary things in such order as to supplement their individual beauty. It seems best to have one item dominant and plant with the whole picture in mind. For example, low spreading subjects should be planted in large numbers as ground cover, from which can spring up definite spikes or mounds of another color. Sometimes succession of flowers or berries or perhaps mingling of colored bark will supply the missing interest in your garden, sure it is that careful thought with some fun-giving practice will produce many a thrill. Don't stint with materials or try too many ideas in a small area. Here are a few suggestions.
